(57) ABSTRACT

An accessory for an electronic device, such as a mobile computing device, includes a housing and a support element that are configured to support the electronic device in an inclined orientation. The support element of the accessory may comprise an elongated recess that receives a portion (e.g., an edge portion) of an electronic device to orient and support the electronic device in the inclined orientation. The accessory may also include a peripheral component, such as a user interface component (e.g., a keyboard, a track pad, etc.) or any other component that may enhance or supplement functionality of the electronic device.
